Business Goal Define:

This website include multiple brands so that you can easily find your selective brand on one website.
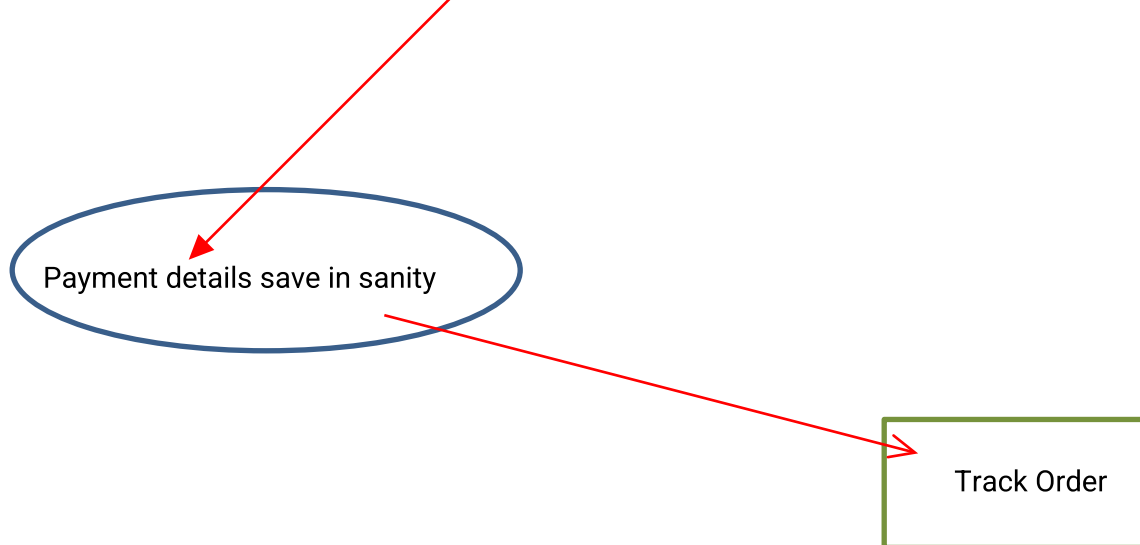

Audience Target:

I Prefer to target clerk or salesperson so that i can run by bussines by wholeselling,But my target is every person who want to buy cloths.In my website clothes are available for ladies and gents only.

Unique Value Proposition (UVP):

You can get multiple brands from one website so that you can save your money by,On one delivery you get multiple brands.Otherwise you need to pay separate delivery charges for each brand.
